

System Requirements

The hardware and software requirements below provide a general guideline for your information. Additional requirements may be necessary depending on specific software application purchase. For more information, please contact your Sage Timberline Office business partner, or submit an information request.

Supported Operating Systems

- Microsoft Windows Server 2003 Enterprise Edition
- Windows Server 2003 Standard Edition
- Windows Small Business Server 2003
- Windows 2000 Advanced Server
- Windows 2000 Server
- Windows 2000 Professional
- Windows XP Professional
- Palm OS 4.0, 4.1, 5.2-5.2.1 (Mobile Estimating, Mobile Purchasing, and Mobile Inventory)
- Palm OS 3.1-3.53 (Mobile Purchasing and Mobile Inventory also support these operating systems)

Processor

- 1.8 GHz minimum for the server that contains the DocuVault (1 GHz for Document Management plus the existing 800 MHz requirement for other Sage Timberline Office applications)
- Workstation: 800 MHz minimum

Memory

- Server operating system: 1.5 GB RAM minimum for the server that contains the DocuVault (1024 MB for Document Management plus the existing 512 MB requirements for other Sage Timberline Office applications)

- Workstation operating system: 256 MB RAM minimum
- Palm OS: 8 MB RAM minimum for Mobile Purchasing and Mobile Inventory, 2 MB minimum for Mobile Estimating

Hard Disk Space

The following requirements are for program files. Add additional space for data files¹

- Accounting and management products on a server or stand-alone computer: 600 MB plus 25 MB per accounting and management application²
- Accounting and management products on a workstation: 295 MB (this assumes that a server hosts accounting and management data)²
- Estimating products on a server, workstation, or stand-alone computer: 260 MB²
- Document Management on a server: 100-200 MB, depending on configuration²
- Document Management on a workstation: 20-100 MB, depending on configuration²
- Residential Management on a server, workstation, or stand-alone computer: 580 MB

Other Requirement

- CD-ROM drive
- USB Port (Document Management and/or Estimating)

- Crystal Reports® Professional or Sage Timberline Office Crystal Reports (required to modify or create Crystal Reports designs)
- Microsoft Internet Explorer 6.0 (Service Pack 1)
- Microsoft Outlook (required to use e-mail features)
- TWAIN compliant scanner (required to scan documents in Document Management)
- SVGA monitor (800 x 600 resolution; 17 inch monitor at 1024 x 768 resolution recommended for Database Editor, Document Management, and Project Management)
- Printer
- WinFax Pro 10.0, 10.01, or 10.03 (required to send faxes in applications that support faxing)³

Supported Protocols

- TCP/IP: Transmission Control Protocol/Internet Protocol. Microsoft servers default to this protocol
- RDP 5: Remote Display Protocol. Microsoft remote protocol, which is used in its remote connection applications
- ICA: Independent Computing Architecture. Citrix remote protocol, which is used in its remote connection application

¹Data space requirements for estimating products and accounting and management products vary greatly depending on the amount of processing that you do. Document Management users: allocate 600 MB for data at your server if you scan 12,000 pages per year and print 1,200 pages per year.

²Add up to 400 MB for required third-party components, which Sage Timberline Office installs as necessary.

³Purchasing and Inventory require UniMessage Pro for faxing.
