

Sage Timberline Office

Service Purchasing-Real Estate

Added to the Sage Timberline Office core Service Management software, the Service Purchasing application provides tight management control over service-related purchases.

Parts purchases required by service technicians are linked by this software to your work orders and purchase orders. You're able to easily track and quickly match vendor invoices to purchase orders and, as needed, automatically update inventory, parts costs, and more.

Purchase order control

- Automatically attach purchase orders to work orders.
- Ensure accuracy by matching vendor invoices to purchase orders.
- Assign purchase order numbers to the system automatically or manually.
- Attach purchase orders to fixed-price jobs in order to track costs.
- Automatically update inventory part costs.

Service Purchasing is a part of Sage Timberline Office, fully integrated software created to streamline work and connect the people you depend on to build your business.

BENEFITS

- Quickly attach purchase orders to work orders from the field
- Increase profitability with more accuracy from parts purchases made in the field
